Sir:

**IN THE CLAIMS**

Attached herewith on a separate sheet is a complete set of claims following the new rules for filing amendments, with the status of the claims and changes marked for each claim.

20 **REMARKS**

The present application now contains claims 1-76. of which claims 32 and 39 have been currently amended and claims 65-76 are new claims. Claims 43-46 are indicated as containing allowable subject matter. Claims 1-42 and 47-64 stand rejected under 35 U.S.C. §102 or 35 U.S.C. §103.

25 **102 rejections**

Claim 64 stands rejected as being anticipated by U.S. patent 5,838,906 to Doyle et al. Applicants respectfully disagree and submit the Examiner did not provide a prima facie case of anticipation. Claim 64 includes the limitation that image reconstruction software is downloaded from the same server that also provides images by request (this issue is also discussed below).

30 Applicants respectfully submit that this limitation is not shown or suggested in Nagashima.

A new claim 74 has been added to include the limitation that the specific image data is requested after receiving the image reconstruction software and during a same session.
